Attracting Tomorrow

SmartMotion®

Platform Introduction Training

TDK InvenSense Development Tool for Motion Sensors

March 2018

InvenSense
MEMS Sensor Business Group
Sensor System Business Company
[4/12/2018]

Agenda

- SmartMotion Platform
  - 6 Axis, 7-Axis, 9-Axis, and 1-Axis development kits
    - DK-20602, DK-20648, DK-20680A, DK-20789, DK-20948, DK-10100

- SmartMotion Hardware Overview
  - Sensor specifications
  - Board layout and Connectors
  - Bring up the board
  - Purchasing the SmartMotion Platform

- SmartMotion Software
  - MotionLink
  - Embedded Motion Drivers (eMD)
  - External Sensor Connection
  - eMD Porting Guidelines

The SmartMotion Platform

March 2018

InvenSense
MEMS Sensors Business Group
Sensor Systems Business Company

What is a Good development platform ?

- Accelerates development of end products for faster market deployment
- “Out of the box” experience for quick set-up
  - Single board design, simple connection
  - Software included, easy to use collateral
  - No support required to bring up the platform
- Affordable; buy several platforms for parallel development
- Debugging features to assist in code development
- System prototyping and demonstration vehicle
- Ability to develop applications without actual hardware to expedite product delivery

TDK InvenSense SmartMotion® Platform

User Friendly Development Platform for TDK InvenSense 6-Axis, 7-Axis 9-Axis, and 1-Axis Motion Sensor

https://www.invensense.com/smartmotion-platform/

Contents	Description
Protective Packaging	The SmartMotion Platform come in a sturdy easy to carry box with protective foam. Please reference MEMS Handling Guide on how to prevent damage to MEMS sensors.
SmartMotion Platform	The SmartMotion board comes with the latest MotionLink software tool pre-flashed on the MCU. The board is configured with default jumper settings.
QuickStart Guide	Instructions to for platform bring up with links to software downloads

SmartMotion® Platform

- Single Board “Out of the Box” experience
  - Microchip G55 MCU + TDK InvenSense Motion Sensor
- On-board embedded debugger
  - Saves $100-$150 for external debugger
  - Simpler set up/no cables for debugger
  - Program and debug the MCU
- Affordable - $99 ASP
  - Customers can buy multiple platforms to speed up development
- Scalable design
  - Supports legacy and future motion sensors
  - WiFi/BLE support with external modules from Microchip
- Less than 15 minutes to set-up

Version B - 6 Axis Sensors

DK-20602 Motion Sensor

Attracting Tomorrow

ICM-20602

World's Best 6-axis Solution

Samples:	**Now**
Production:	**Now**

Specifications

- High Performance Gyro
  - Gyro Sensitivity Error: ±1%
  - Gyroscope Noise: ±4mdps/√Hz
- High Performance Accel
  - Accel Noise: ±100µg/√Hz
  - Accel Sensitivity: ± 1%
- Low Power Solution
  - Full Power: 2.79mA
  - LP Gyro/Accel Mode: 1.33mA
- Gyroscope Full-Scale Range: ±250/500/1000/2000 deg/sec
- Accelerometer Full-Scale Range: ±2/4/8/16g
- Package Size: 3x3x0.75mm 16-Pin LGA
- Software Available: Yes

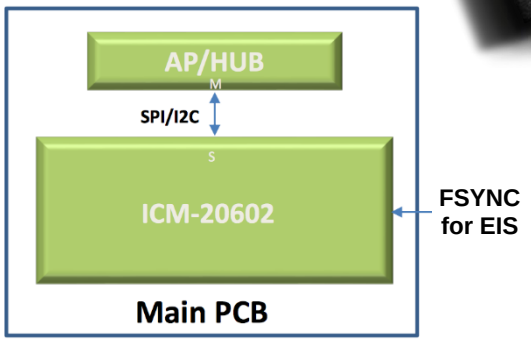
Datasheet: ICM-20602 DataSheet

Applications

- IoT
- Augmented Reality
- Drone
- Virtual Reality

Solution Benefits

- Device includes 1K-byte FIFO to reduce traffic on serial bus interface
- Reduce power consumption by allowing the system processor to burst read sensor data and then go to LP mode
- Includes on chip, 16-bit ADC's, programmable digital filters, an embedded temp sensor, and programmable interrupts.



DK-20648 Motion Sensor

Attracting Tomorrow

ICM-20648

6-Axis DMP Enabled Solution

Samples:	**Now**
Production:	**Now**

Specifications

- Digital Motion Processor (DMP) for autonomous operation
- Programmable interrupts, filters, and 4k-byte FIFO
- Gyroscope Full-Scale Range: ±250/500/1000/2000 deg/sec
- Accelerometer Full-Scale Range: ±2/4/8/16g
- Runtime Calibration
- Operating Temperature Range: -40ºC to 85ºC
- Operating Voltage Range:
  - VDD 1.71V – 3.6V
  - VDDIO: 1.71V – 3.6V
- Host Interface: SPI 7MHz, I^2C up to 400kHz
- Package Size: 3x3x0.9mm 24-Pin QFN
- Software Available: Yes

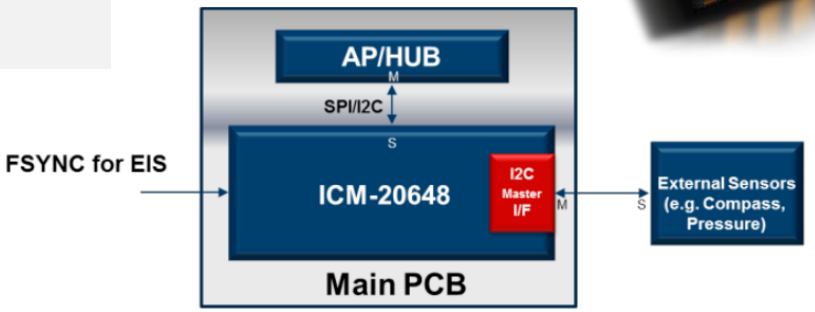
Datasheet: ICM-20648 DataSheet

Applications

- IoT
- EIS
- Wearables

Solution Benefits

- Provides Step Count, Activity Classifier, and B2S (Bring-to-See) Gestures tuned for wrist worn wearable applications.
- DMP offloads computation of motion processing algorithms from the host processor, improving system power performance
- Enhanced FSYNC functionality to improve timing for applications like EIS



DK-20680A Motion Sensor

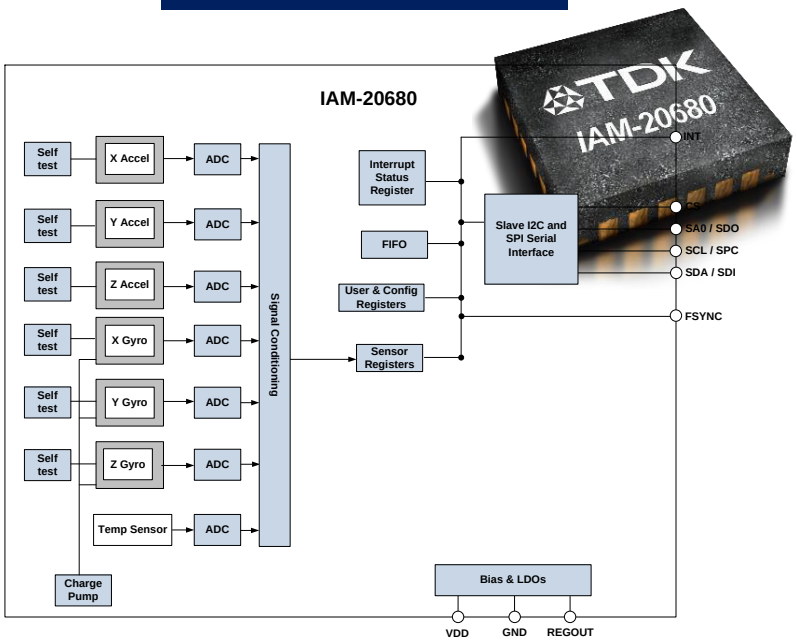
Attracting Tomorrow

TDK

IAM-20680

6-Axis Automotive IMU Solution

Samples: Now
Production: Now



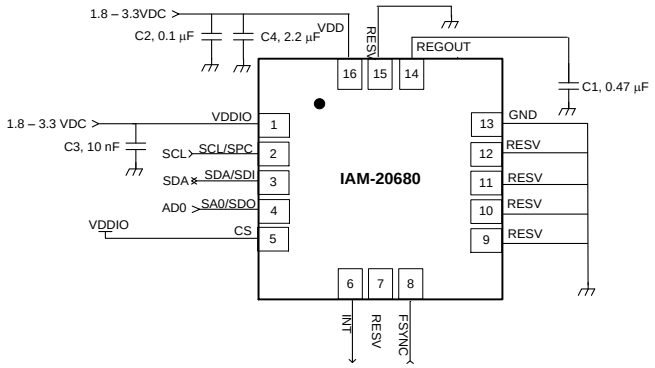
Specifications

- AEC-Q100 GRADE 3
- High Performance and Accuracy
- Gyroscope Full-Scale Range: ±250/500/1000/2000 deg/sec
- Accelerometer Full-Scale Range: ±2/4/8/16g
- Low Noise
  - Gyro 0.005 dps/√Hz
  - Accel 135 ug/√Hz
- Operating Temperature Range: -40ºC to 85ºC
- Operating Voltage Range:
  - VDD 1.71V – 3.6V
  - VDDIO: 1.71V – 3.6V
- Host Interface: SPI 8MHz, I²C up to 400kHz
- Package Size: 3x3x0.75mm 16-Pin LGA

Datasheet: IAM-20608 DataSheet

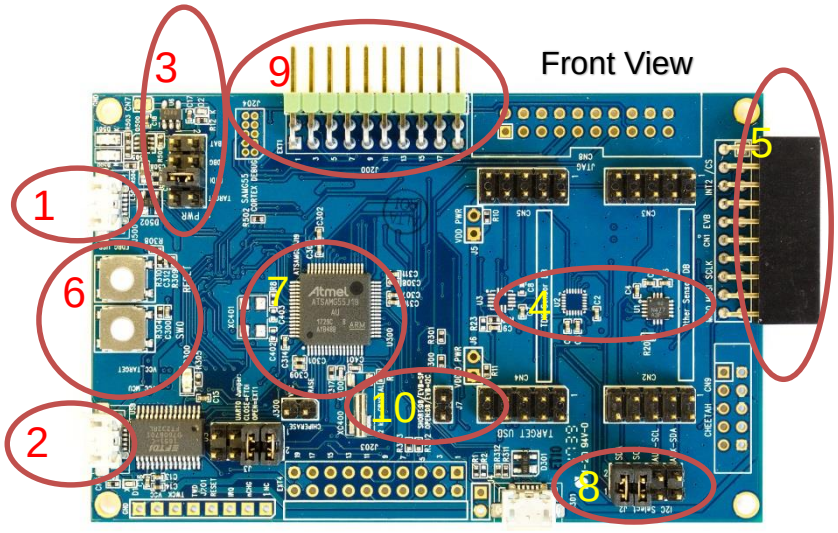
Applications

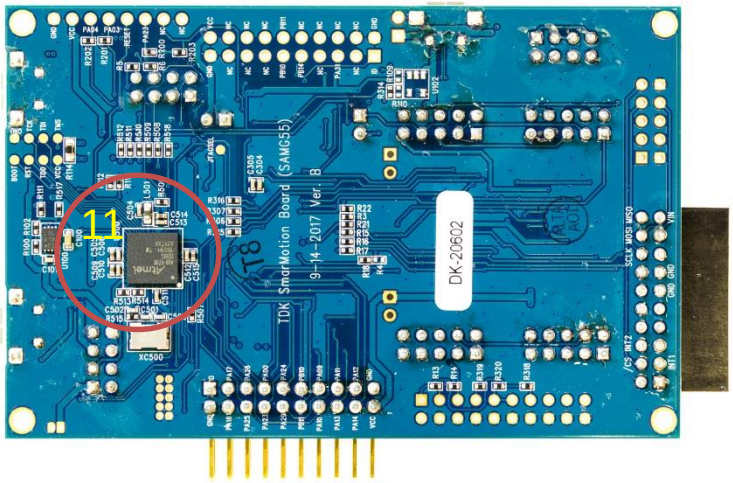
- Lift Gate Motion Detect
- Navigation
- Image Stabilization
- Vehicle Tracking



SmartMotion Platform – 6 Axis

Attracting Tomorrow





Main Hardware Features

1. EDBG USB – Embedded Debugger USB output and/or power input
2. FTDI USB – Main UART output for software. Default power input for SmartMotion board
3. PWR Source Select – Can be configure to select power from different sources. By default it is set for FTDI input (5+6)
4. On-Board Motion Sensor – U1 footprint for ICM-20602 and IAM-20680. U2 for ICM-20648
5. TDK Sensor EVB Connector – Connector to attached other TDK-InvenSense Sensor EVB boards. Can only support 2.5V and above!
6. Reset and User Button – Reset used for SAMG55 MCU, User Button optional for software use
7. ATMEL SAMG55 MCU – ARM Cortex-M4 MCU, http://www.microchip.com/wwwproducts/en/ATSAMG55
8. Sensor I2C Selection – selects sensor I2C slave source from primary I2C or AUX I2C. Default is primary (1+2, 3+4)
9. Extension Header – for future support of other components such as BLE. Same header as Microchip's Xplained-Pro Board.
10. External EVB interface – jumper to select I2C (open) or SPI (closed) interface to the external EVB if attached
11. Embedded Debugger – for flashing main MCU and code tracing. No external JTAG needed!

SmartMotion : 9, 7, and 1 Axis Platforms

March 2018

InvenSense
MEMS Sensors Business Group
Sensor Systems Business Company

DK-20948 Motion Sensor

Attracting Tomorrow

ICM-20948

World's Best 9-axis Integrated Solution

Samples: Now
Production: Now

Specifications

- Digital Motion Processor (DMP) for autonomous operation
- Gyroscope Full-Scale Range: ±250/500/1000/2000 deg/sec
- Accelerometer Full-Scale Range: ±2/4/8/16g
- Operating Voltage Range:
  - VDD 1.71V – 3.6V
  - VDDIO: 1.71V – 1.95V
- Host Interface: SPI 7MHz, I^2C up to 400kHz
- Software Available: Yes
- Low Power Mode: 2.5mW
- Compass FSR: ± 4900µT
- Package Size: 3x3x.1mm 24-Pin QFN
- Software Available: Yes

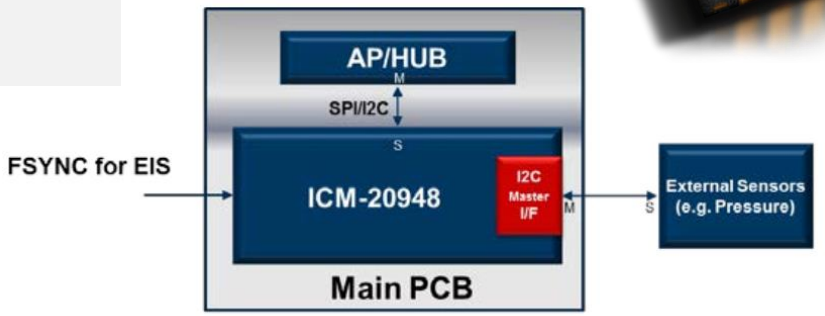
Datasheet: ICM-20948 DataSheet

Applications

- IoT
- Wearable
- Drone

Solution Benefits

- Lowest power 9-axis solution in the world
- P2P compatible with the MPU-9250
  - 1/3 less power then previous solution
- Supports FSYNC for EIS



DK-20789 Motion Sensor

Attracting Tomorrow

ICM-20789

World's Only 7-axis Integrated Solution

Samples: Now
Production: Now

Specifications

- Programmable interrupts, filters, and 4k-byte FIFO
- Gyroscope Full-Scale Range: ±250/500/1000/2000 deg/sec
- Accelerometer Full-Scale Range: ±2/4/8/16g
- Pressure Operating Range: 300hPa – 1100hPa
- Relative Pressure Accuracy: **±1Pa** (10hPa change,700-1000hPa)
- Absolute Pressure Accuracy: ±1hPa(300hPa-1100hPa,0ºC-65ºC)
- Temperature Sensor Accuracy: ±0.4ºC
- Operating Temperature Range: -40ºC to 85ºC
- Operating Voltage Range:
  - VDD 1.7V – 3.45V
  - VDDIO: 1.8V
- Host Interface: SPI 8MHz, I^2C up to 400kHz
- Packages: 4 x 4 x 1.365mm 24-pin LGA

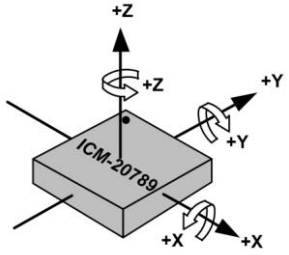
Datasheet: ICM-20789 DataSheet

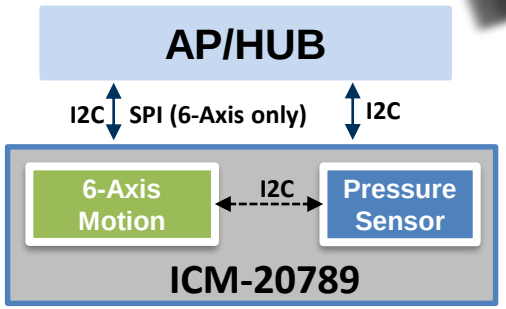
Applications

- Drones
- Motion-based controllers
- Mobile Phones
- Virtual Reality Headsets/Controllers
- Toys

Solution Benefits

- Integrated & calibrated Accel+Gryo+Pressure+Temp sensor provides quick time-to-market in small footprint
- Allow host to sleep/save power while monitoring motion
- Detect Z-height of 8cm for accurate motion measurements: navigation, dead-reckoning, floor detection, fitness recognition
- Lower power consumption extends battery life
- Easy migration from 6-Axis motion sensor to 6-Axis+Pressure





DK-10100 Pressure Sensor

Attracting Tomorrow

ICP-101XX

Barometric Pressure and Temperature Sensor

Samples: Now
Production: Now

Specifications

- Pressure Operating Range: 300hPa – 1100hPa
- Relative Pressure Accuracy: **±1Pa (**10hPa change,700-1000hPa)
- Pressure Noise RMS and Current Consumption:
  - Low-Power Mode: **3.2Pa at 1.3µA**
  - Low-Noise Mode: **0.8Pa at 5.2µA**
  - Ultra Low-Noise Mode: **0.4Pa at 10.4µA**
- Absolute Pressure Accuracy: ±1hPa (300hPa-1100hPa,0ºC-65ºC)
- Pressure Sensor Tempco: ±0.5Pa/ºC (25ºC-45ºC, 100kPa)
- Temp
- Opera 5%
- Host I

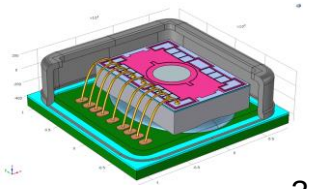
PACKAGE	3-HOLE IPX8: 1.5m WATERPROOF	1-HOLE
2x2x0.72mm 10L LGA	ICP-10100	ICP-10101
2x2.5x0.92mm 8L LGA	ICP-10110	ICP-10111

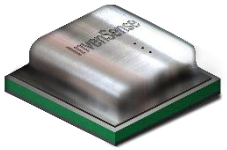
Applications

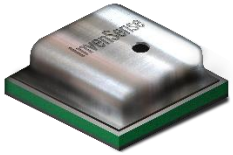
- Drones
- Fitness Bands/Trackers
- Mobile Phones
- Virtual Reality Headsets/Controllers
- Elderly Fall Detection
- Security Systems
- Hard Drives and Servers

Solution Benefits

- Completely integrated & calibrated pressure and temp sensor IC provides quick time-to-market
- Detect Z-height of 8cm for accurate motion measurements: navigation, dead-reckoning, floor detection, fitness recognition
- Lower power consumption extends battery life or improved accuracy at same power consumption
- Three-0.025mm holes reduce liquid intrusion

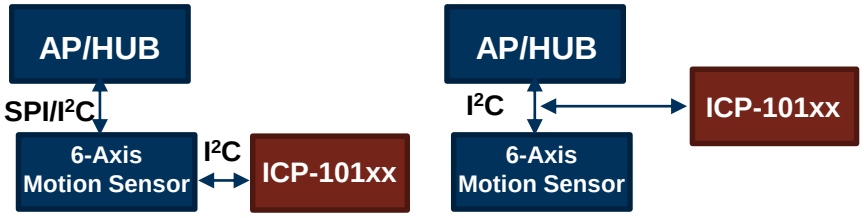




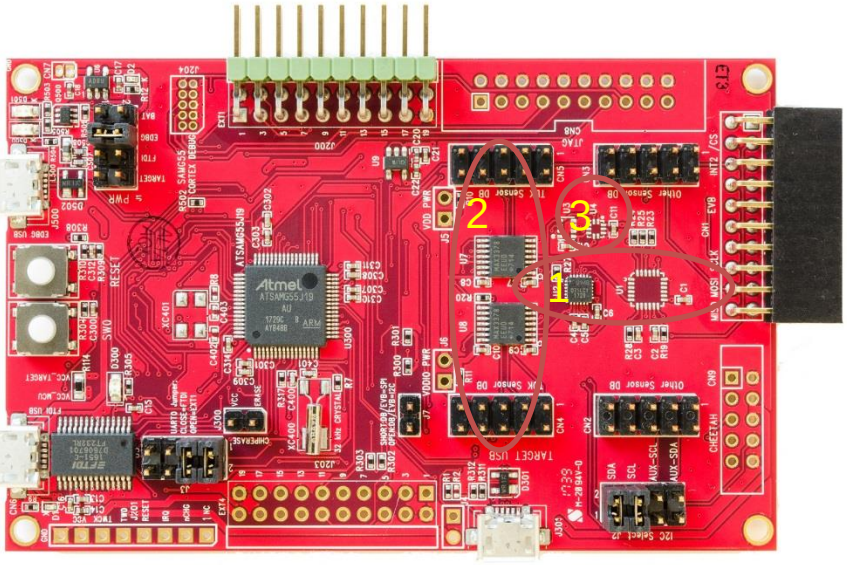


3-Hole: IPx8 Compliant Waterproof to 1.5m Depth

Single Hole Package



SmartMotion Platform : 9, 7, and 1 Axis



Main Hardware Features

Similar to 6 Axis Board except for the following

1. On-Board Motion Sensor – U2 footprint for ICM-20948, U1 footprint for ICM-20789
2. Level Shifter – change power level to 1.8V for the on-board sensor only. This is primary for ICM-20948 and ICM-20789 which requires this voltage.
3. On-Board Pressure Sensor – U4 footprint for ICP-101XX

Individual TDK-InvenSense Motion EVBs are also widely available at same distributors

SmartMotion Platform Contents

Attracting Tomorrow

Each purchased SmartMotion comes with the following

Contents	Description
Protective Packaging	The SmartMotion Platform come in a sturdy easy to carry box with protective foam. Please reference MEMS Handling Guide on how to prevent damage to MEMS sensors.
SmartMotion Platform	The SmartMotion board comes with the default jumper settings. It also comes with the latest MotionLink Software Tool pre-flashed into the MCU.
QuickStart Guide	Short description on SmartMotion overview and how to quickly get started along with links to downloadable software.

Attracting Tomorrow

Connecting the SmartMotion Platform

March 2018

InvenSense
MEMS Sensors Business Group
Sensor Systems Business Company

It's so Simple!

- Connecting the Boards
  - PC/Laptop – preferably running Win 7
  - Micro-USB cables –
    - FTDI USB Connector (CN6) to PC – Required for default power and most data output
    - EDGB USB Connector (J500) to PC – Optional, only needed if customers planning to flash or trace code. For eMD can be used this output for debug message outputs.

Attracting Tomorrow

SmartMotion : Software Tools

March 2018

InvenSense
MEMS Sensors Business Group
Sensor Systems Business Company

Software Evaluation Tools

2 Software Packages

- SmartMotion Installer with MotionLink
- Embedded Motion Drivers (eMDs)
- Both tools available for free download at the TDK-InvenSense Developer's Corner (requires registration)

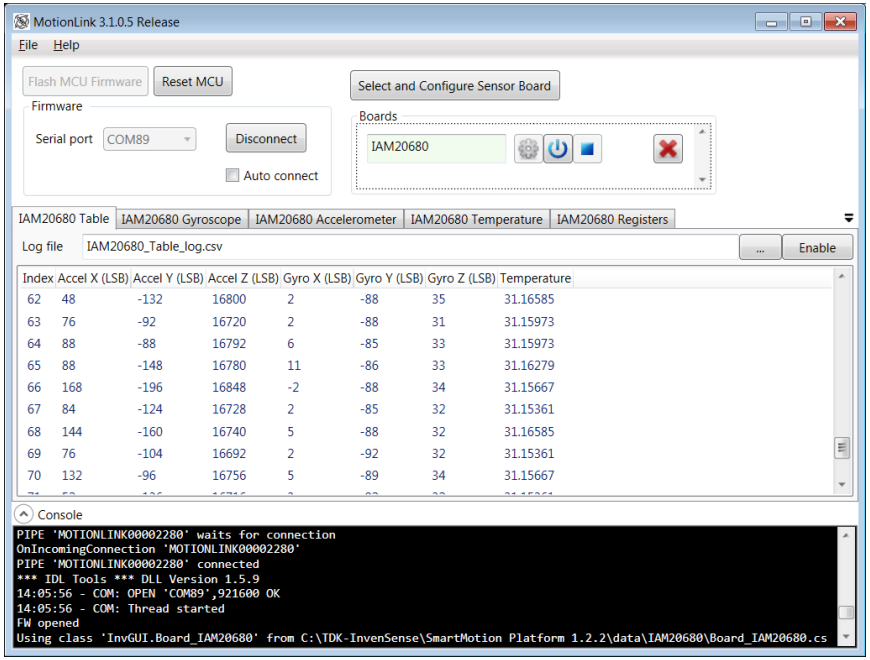
https://www.invensense.com/developers/software-downloads/

Software Evaluation Tools

Attracting Tomorrow

The MotionLink - Hardware Evaluation Tool

- PC Based Software with following features –
  - ¬ Read Register Map Values
  - ¬ Simple I2C read and writes
  - ¬ Display raw sensor data up to 1Khz sample rate
  - ¬ Log Data to text file
  - ¬ Display graphical sensor data



- Why MotionLink? –
  - ¬ Evaluate and log raw gyro, accel, and other sensor data
  - ¬ Will support all channel motion parts

Software Evaluation Tools

Attracting Tomorrow

MotionLink supports the latest TDK-InvenSense Motion Hardware including

Software Evaluation Tools

The Embedded Motion Driver (eMD) for SmartMotion Platforms

- Motion Software (dependent on product) can include these features…
  - ¬ Initialization and configuration
  - ¬ Raw Sensor Data streaming
  - ¬ Sensor Fusion output
  - ¬ Gesture Tracking
  - ¬ DMP Image (if applicable)
  - ¬ Factory Test and Calibration
  - ¬ In-Use Calibration
  - ¬ Wake-On-Motion

- Currently supported SmartMotion eMDs
  - ¬ ICM20602
  - ¬ ICM20648
  - ¬ ICM20948
  - ¬ ICM20789
  - ¬ ICP-10100
  - ¬ IAM-20680

Software Evaluation Tools

- **ICM-20948 eMD Features Example -**

- Sensor Data -
  - ¬ Raw Accelerometer
  - ¬ Raw Gyroscope
  - ¬ Raw Magnetometer
  - ¬ Dynamically Calibrated Accelerometer
  - ¬ Dynamically Calibrated Gyroscope
  - ¬ Dynamically Calibrated Magnetometer

- Gesture Detection -
  - ¬ SMD (Significant Motion Detection)
  - ¬ PickUp Detection
  - ¬ Tilt Detection
  - ¬ B2S (Bring to See) Detection
  - ¬ BAC (Basic Activity Classifier) – Android-based activity detection of Walking, Standing, Running, Biking, and Transport
  - ¬ Step Detector
  - ¬ Step Counter (Pedometer)

- Sensor Fusion -
  - ¬ Game Rotation Vector – Accel and Gyro based RV
  - ¬ Rotation Vector – Accel, Gyro, and Mag based RV
  - ¬ Geomagnetic Rotation Vector – Accel and Mag based RV
  - ¬ Heading
  - ¬ Euler Angles
  - ¬ Quaternion generation
  - ¬ Gravity
  - ¬ Linear acceleration
  - ¬ Orientation

Attracting Tomorrow

MotionLink : Getting Started

March 2018

InvenSense
MEMS Sensors Business Group
Sensor Systems Business Company

Installing the PC Software

3rd Party Software Drivers –

- ATMEL Studios – free Atmel IDE for all Microchip/Atmel MCUs
  - ¬ Required to flash and trace code
  - ¬ As of release MotionLink and eMD developed using Atmel Studio v. 7.0.1417
  - ¬ https://www.microchip.com/avr-support/atmel-studio-7

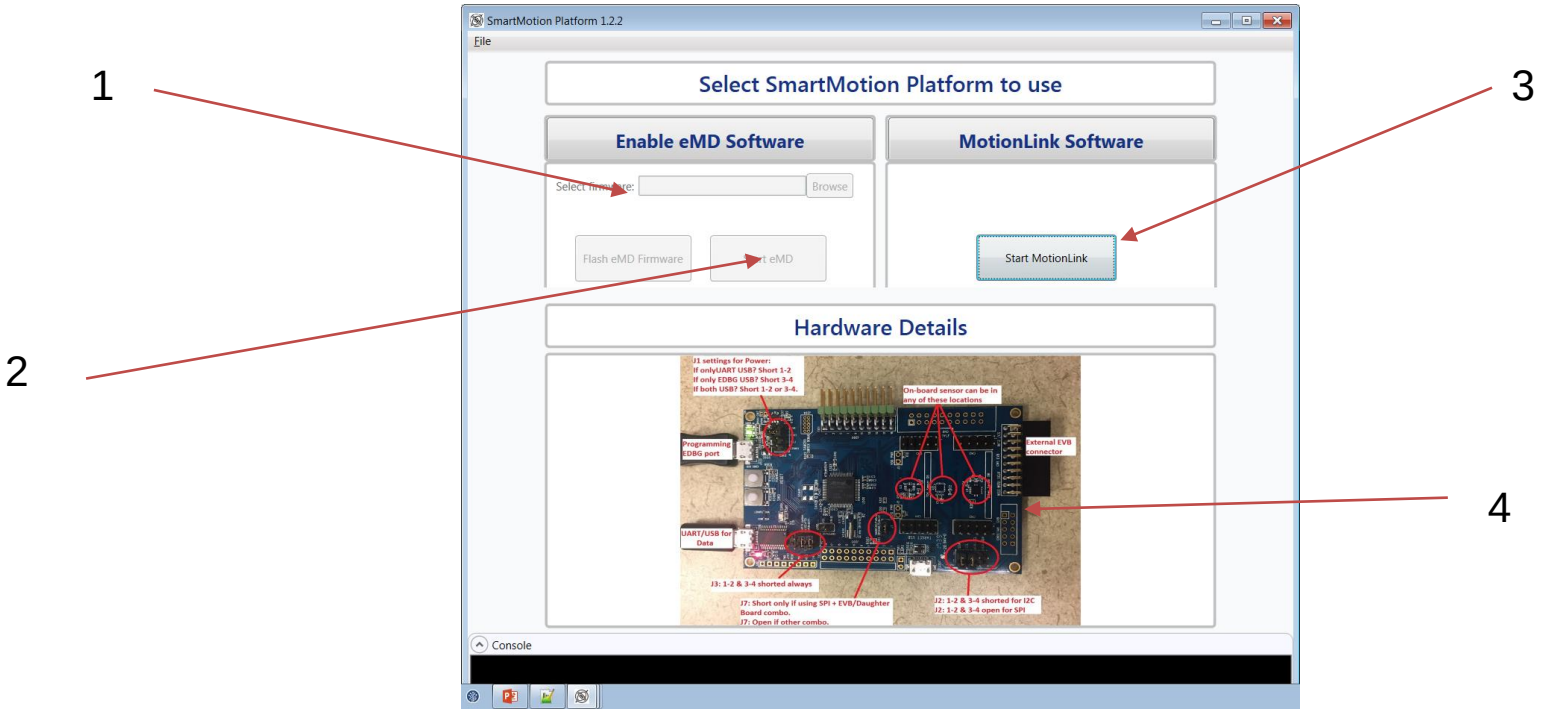
- FTDI Driver - http://www.ftdichip.com/Drivers/VCP.htm
  - ¬ MotionLink install will include the driver and prompt user for installation

Install SmartMotion Installer with MotionLink–

- Download and Install from InvenSense Developer's Corner –
  - ¬ https://www.invensense.com/developers/software-downloads/

Connect SmartMotion platform and open MotionLink at Launcher!

SmartMotion Launcher

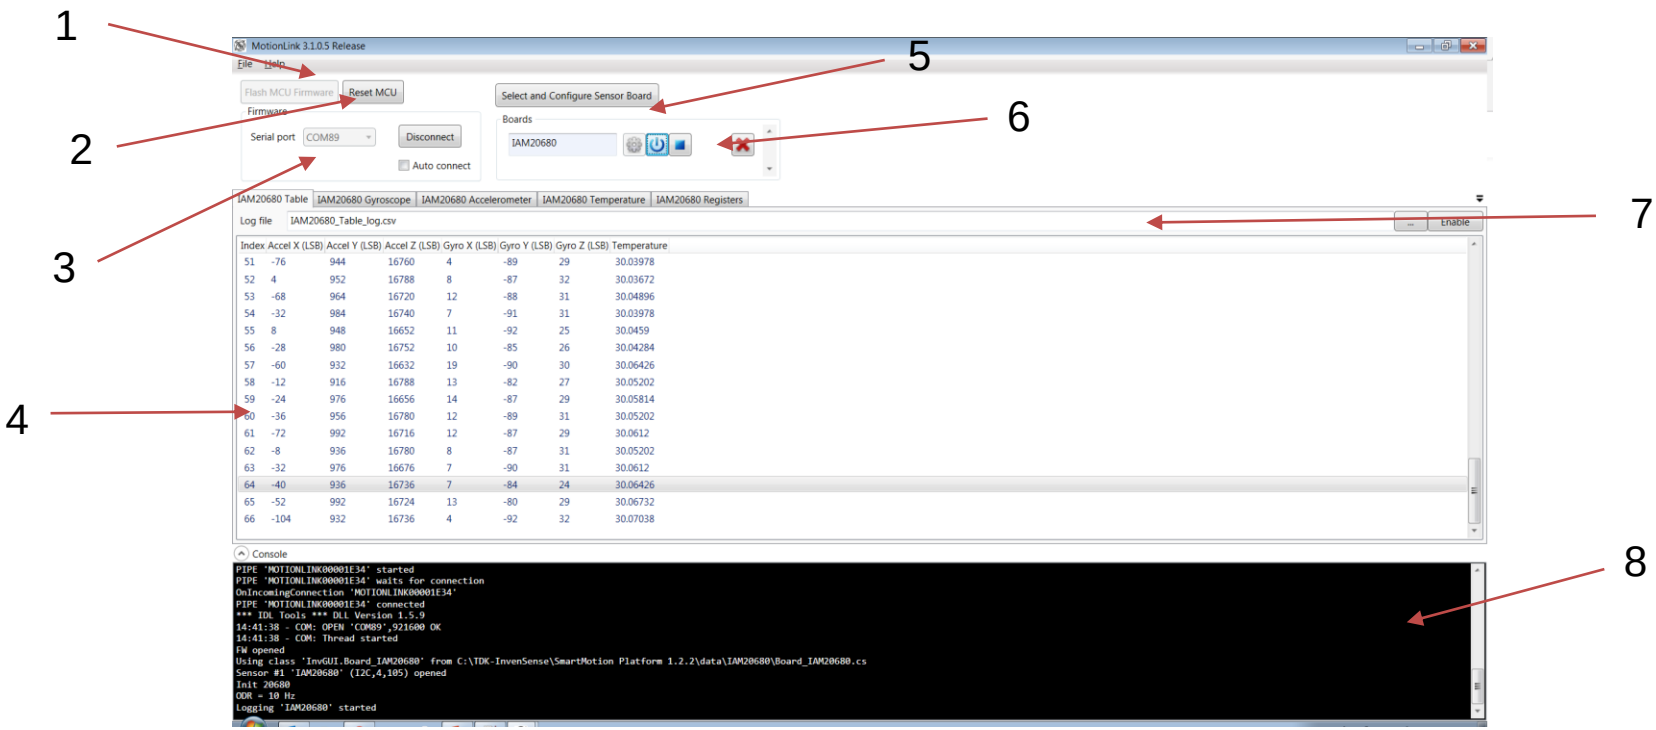


SmartMotion Hardware is pre-flashed with MotionLink!

SmartMotion Launcher page – select between using eMD or MotionLink

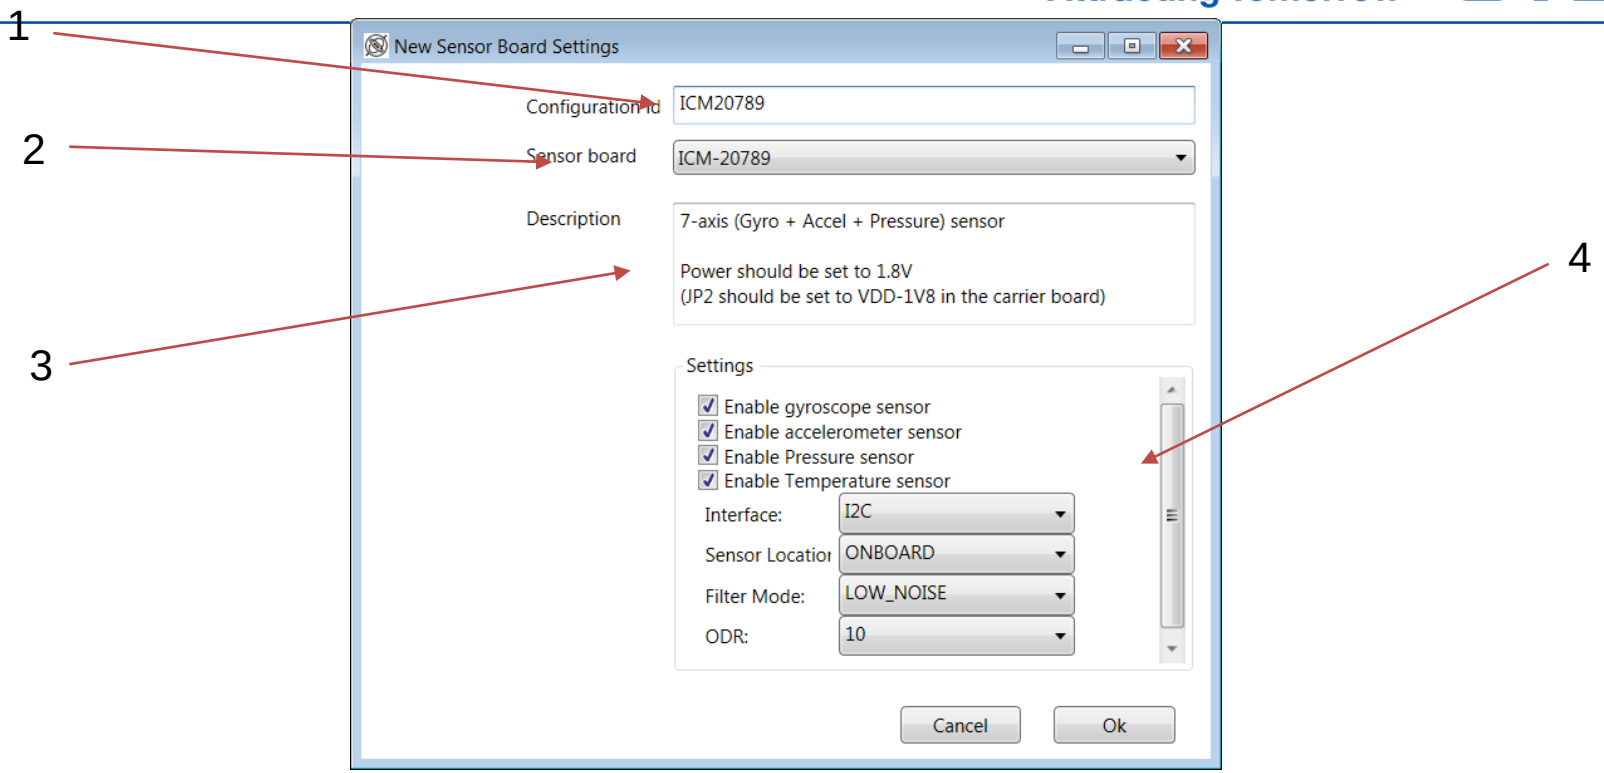
1. eMD Software – flash Atmel G55 MCU with a released version of eMD
    - SmartMotion Installer will have a version of the eMD release
    - Allow customers to browse for MCU images to flash
2. 'Start eMD' - Will open up the 'sensor-cli' command window usually used for eMD interface
3. MotionLink Software – will start up the MotionLink GUI
4. Hardware Details – Description of DK board jumpers and settings

MotionLink Features



1. Flash Firmware – flash G55 MCU with MotionLink firmware or base eMD. Requires Atmel Studios!
2. Reset MCU – erases the firmware on the MCU
3. FTDI COM port connection – connect to the FTDI COM output. (not the EDGB COM port)
4. Data Output Console – displays requested data through the tab windows, registers, sensor data, and graphical data
5. Sensor Board Configuration – Adds target sensors to be evaluated
6. Sensor Board Control – Initialize and capture data control
7. Log File Output – can specify text log file for the sensor data if requested
8. Message Console Output – outputs error and status messages

MotionLink Features



Adding New Sensor Board Configurations

1. Configuration ID – Customer customizable ID for that particular sensor board configuration to be added
2. Sensor Board – drop down list on the full motion parts to be selected
3. Description – short description on the selected parts
4. Sensor Settings –
    - Customer can specify on which hardware sensor to stream
    - Specify I2C or SPI interface
    - Sensor Location if on board or attached external sensor EVB (on-board I2C address is always 0x69 while external I2C address is always 0x68)
    - Filter Mode to either Low_Noise (high power) or Low_Power (higher noise)
    - ODR selectable up to 1Khz

Attracting Tomorrow

Embedded Motion Driver (eMD) : Getting Started

March 2018

InvenSense
MEMS Sensors Business Group
Sensor Systems Business Company

Installing the PC Software

3rd Party Software Drivers for Hardware –

- ATMEL Studios – free Atmel IDE for all Microchip/Atmel MCUs
  - ¬ Required to flash and trace code
  - ¬ As of release MotionLink and eMD developed using Atmel Studio v. 7.0.1417
  - ¬ https://www.microchip.com/avr-support/atmel-studio-7

- FTDI Driver - http://www.ftdichip.com/Drivers/VCP.htm
  - ¬ Included with MotionLink install

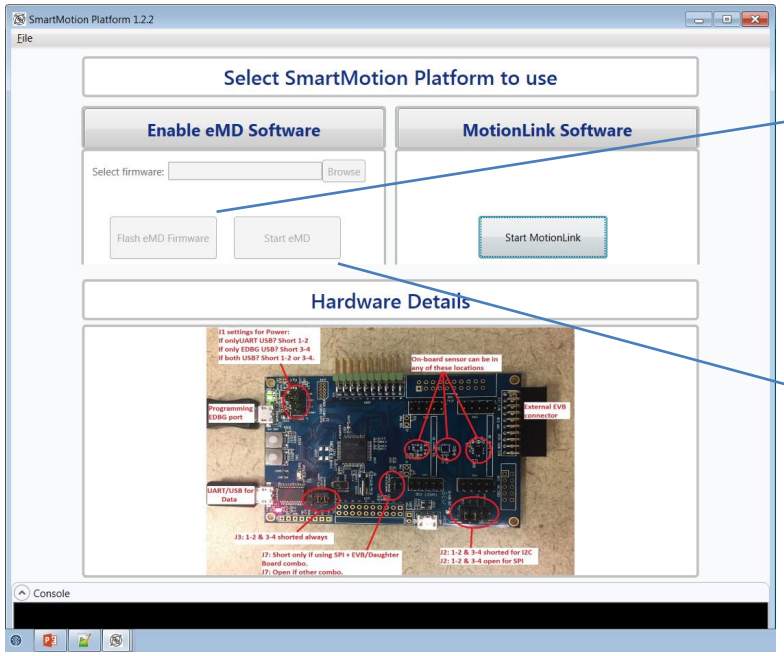
Install TDK-InvenSense eMD – 2 Options

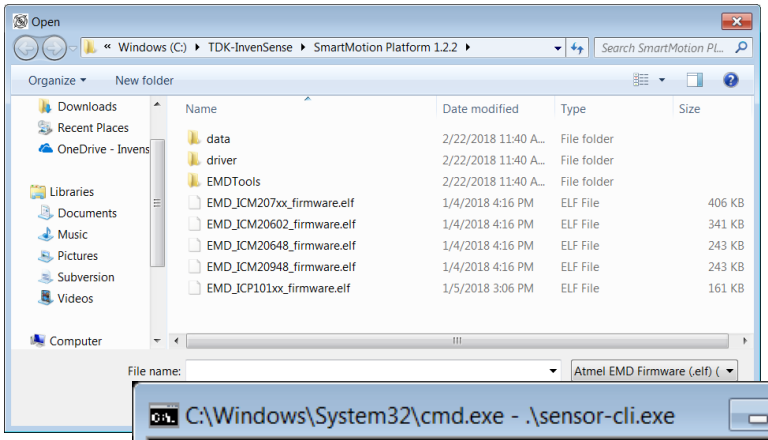
- Option 1 – Download ‘SmartMotion Installer’. SmartMotion Installer will have a base eMD that can be downloaded to the MCU
- Option 2 – Download latest ‘eMD for SmartMotion’ Atmel Studio project to be compiled and download to the MCU

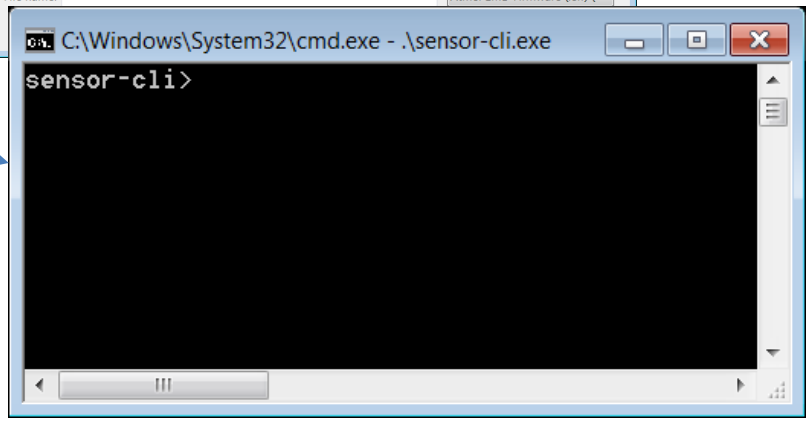
https://www.invensense.com/developers/software-downloads/

Connect SmartMotion platform and to PC

Using SmartMotion Installer for eMD

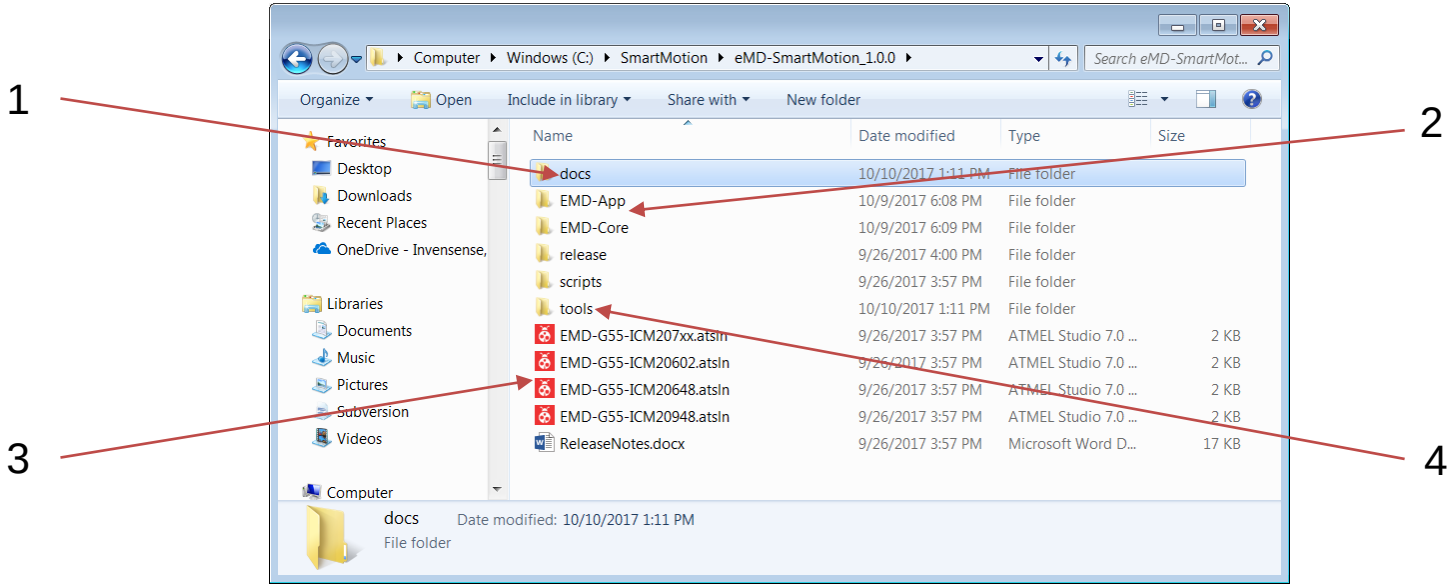






- SmartMotion Installer comes with feature to flash and use the eMD firmware
  - ¬ Requires Atmel Studio
  - ¬ Release eMD image but possibly an earlier version
  - ¬ MotionLink feature will not be able to function if using eMD
- In SmartMotion Launcher page click “eMD Software” to start the process
- Selecting “Browse” for will bring up a directory with pre-installed eMD images (.elf files)
- Selecting “Start eMD” will bring up a sensor-cli window
  - ¬ DK-20680A does not use the sensor-cli but outputs through the serial port (J500 connector)

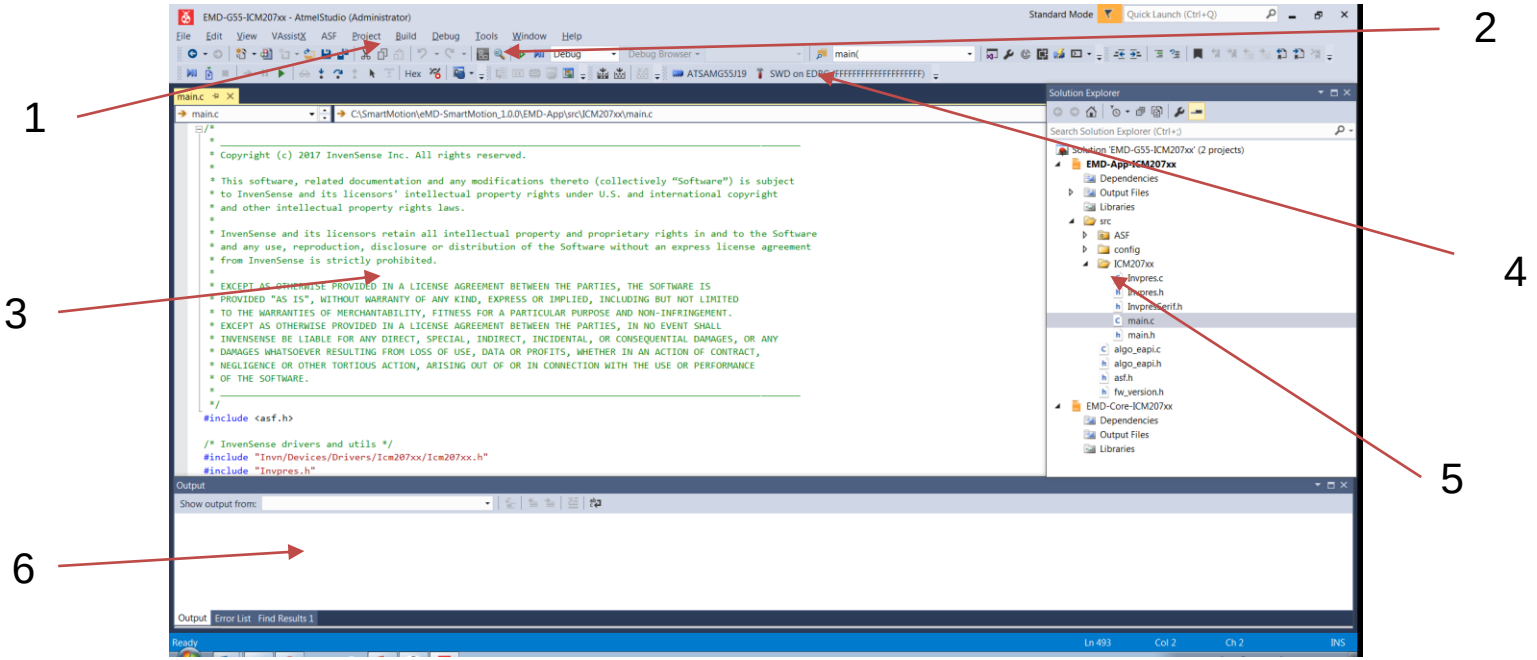
eMD - Atmel Studio Project



eMD Release Package

1. Docs directory : contains detailed SW User Guides and other documentations
2. EMD-App and EMD-Core : contains main driver code. ‘App’ has the main.c as well as board specific files. ‘Core’ has the libraries as well as the sensor driver files.
3. Atmel Studio Project Files : A specific main project for each SmartMotion platform to be opened in Atmel Studios
4. Tools directory : Contains ‘sensorcli.exe’ the command line tool to interface with the eMD

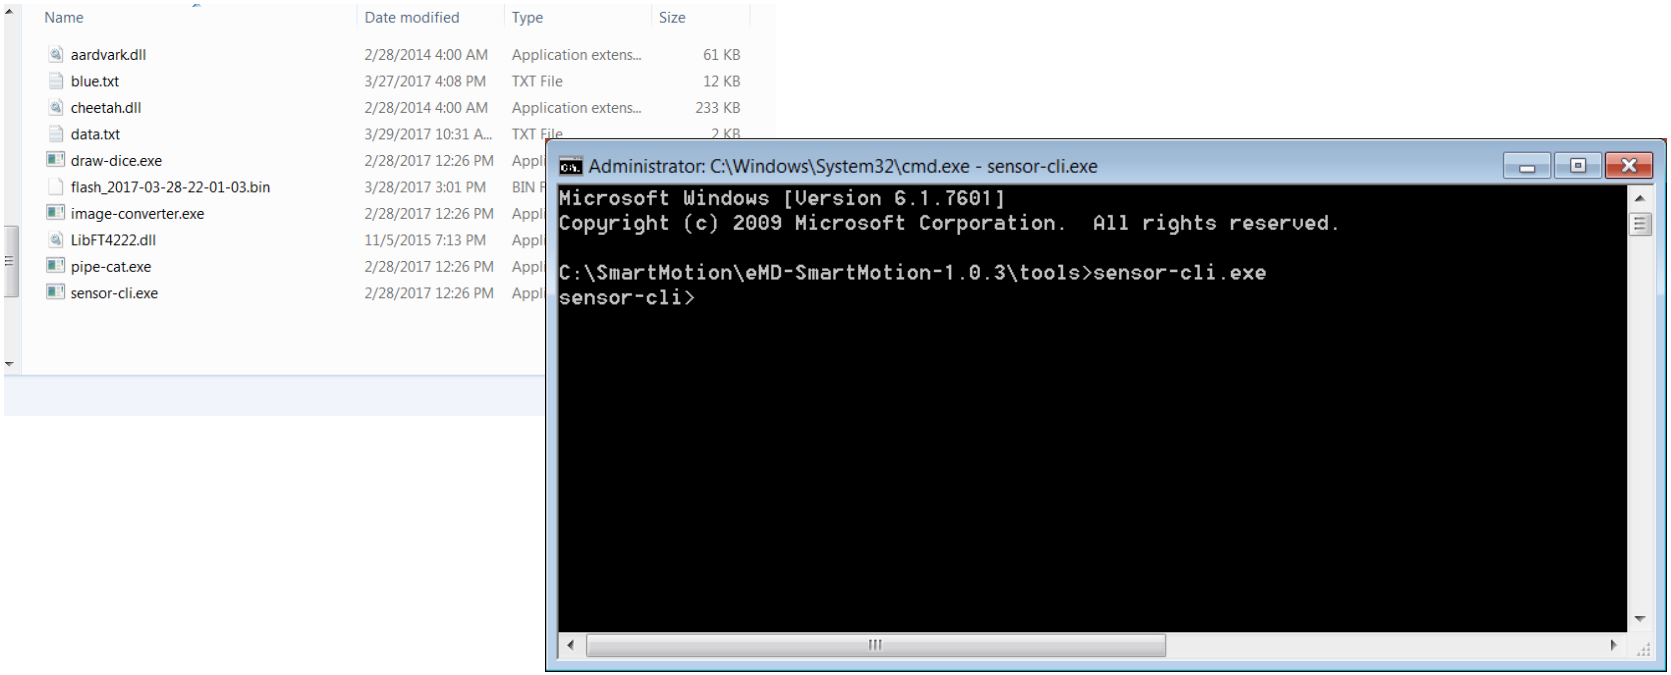
eMD - Atmel Studio Project



Quick Overview - Atmel Studio IDE

1. Control Tabs – Pull down tabs to build and compile project
2. Debug Controls – Used for code tracing
3. Main Code Console – display selected code
4. Target – targeted MCU and also debugger, make sure it is specify to ‘ATSAMG55J19’ and ‘SWD on EDGB’
5. Project Tree – directory of all project files
6. Debugging and Message console – misc messages from IDE

SmartMotion eMD – using sensor-cli.exe

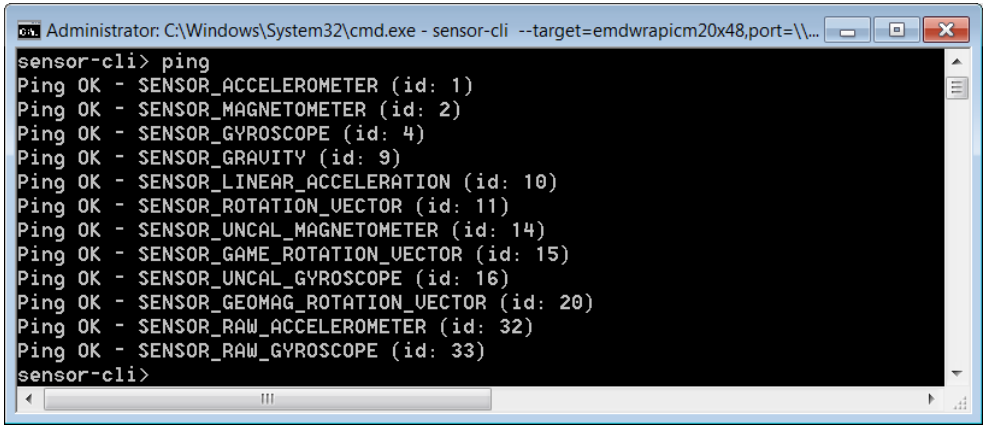


- ‘Sensor-cli’ is the command line tool which interfaces with the eMD and the SmartMotion board
  - ¬ Open ‘tools’ directory in release package, you should see the sensor-cli.exe along with other drivers
  - ¬ Open Command Prompt at the directory location and execute the sensor-cli.exe by running command
    - If only 1 SmartMotion hardware is connected to PC
      - ‘sensor-cli.exe’
    - Multiple SmartMotion – ‘sensor-cli --target=emdwrapicm20x48,port=\\.\COM66 --adapter=dummy’
      - Target argument will be specific to the SmartMotion platform, see SW User Guide for target
      - Port will be the FTDI COM port, can be found in PC Device Manager
  - ¬ If successful you will see a ‘sensor-cli>’ prompt on the command window

SmartMotion eMD – common sensor-cli.exe commands

- sensor-cli.exe has full range of commands to interface with the eMD specifies in SW User Guide
- Useful Commands
  - ‘help’ – displays set of commands and input arguments. You can also ‘help <command>’

  - ‘ping’ – displays all sensors available and their IDs



SmartMotion eMD – common sensor-cli.exe commands

- Useful Commands continued…
  - ‘en <sensorid>’ – streams the sensor data to console.

  - ‘dis all’ will stop all data streaming

SmartMotion eMD – common sensor-cli.exe commands

- Useful Commands continued…
  - ¬ Displaying the cube
    - ‘cube on <sensorid>’ – the cube window will appear but will not move until you enable the sensor. Best results are to use fusion sensors like Rotational Vectors (‘rv’ or ‘grv’)
    - ‘en <sensorid>’ – the sensor will start streaming to console, you will see the cube move based on the sensor data.

  - ¬ Other commands –
    - selftest, setting ODRs, bias configurations, logging, etc….

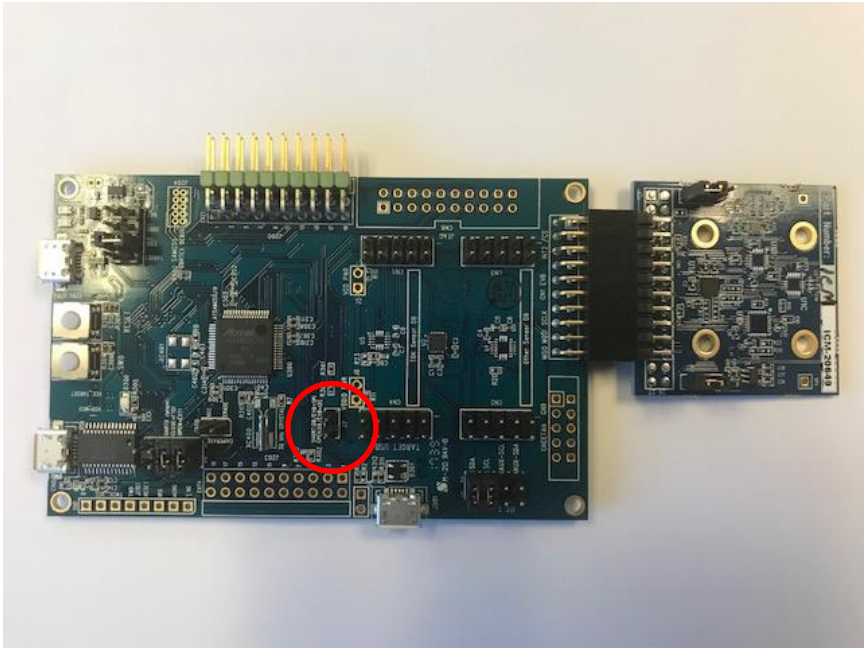
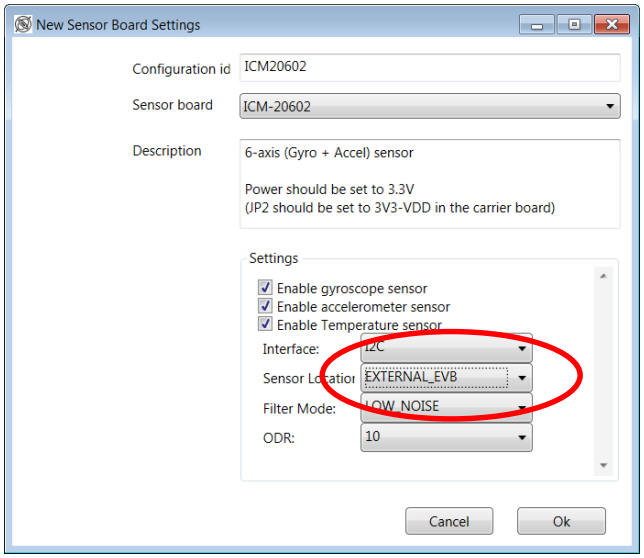
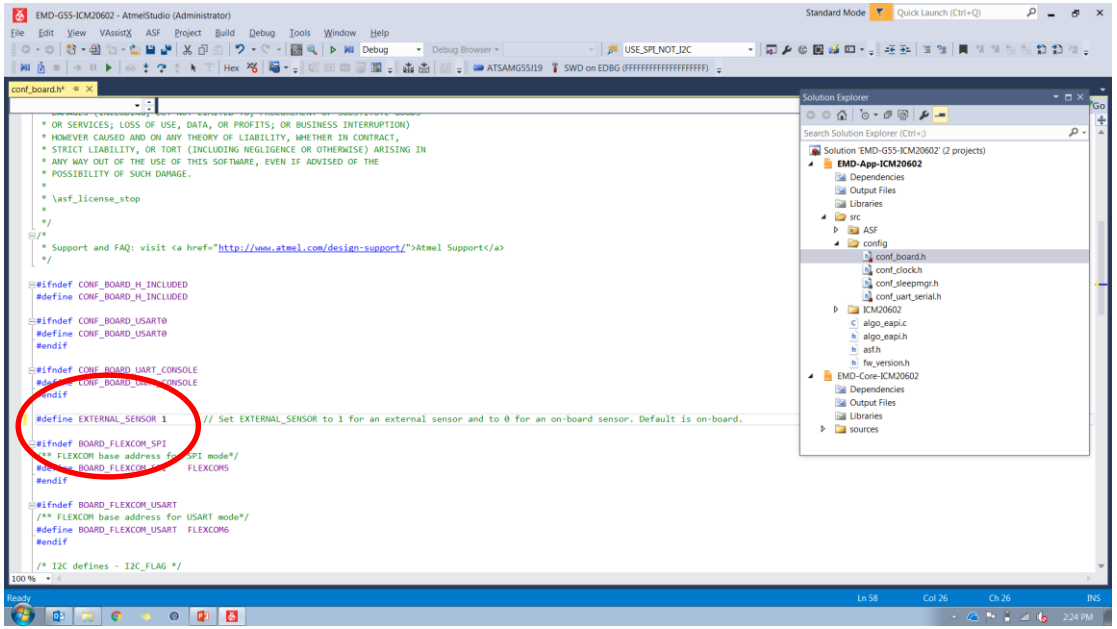
Connecting TDK-InvenSense Motion EVBs



- TDK-InvenSense motion EVBs are sold separately and can be connected to the SmartMotion Platform
- MotionLink and eMDs can interface with the EVB if supported
  - ¬ Motion parts which requires 1.8V VDDIO cannot be supported (ICM-20789 and ICM-20948)
  - ¬ External EVB requires eMDs to change to I2C address 0x68
  - ¬ Jumper J7 – interface to external EVB
    - I2C – Open
    - SPI – Closed
    - ICM-20602, ICM-20648, ICM20948 eMD are default SPI
    - ICM-20789 eMD are default I2C

MotionLink and eMD– External EVB Connection





MotionLink – Select EXTERNAL_EVB as the location when adding new sensors

eMD – conf_board.h , set EXTERNAL_SENSOR flag to ‘1’

Attracting Tomorrow

eMD Porting Guidelines

March 2018

eMD Porting Guidelines

- MCU requirements
  - Atmel G55
    - Cortex M4 wth FPU
    - 120Mhz CPU Speed
    - 512Kb flash, 176Kb SRAM
    - I2C, SPI, UARTS
  - eMD v 1.0.4 Current Memory
    - 120Kb to 140Kb flash
    - 20Kb SRAM
    - SPI or I2C support

- Sensor Fusion
  - DK-20648 and DK-20948 - on board DMP
  - DK-20789 and DK-20602 – MCU sensor fusion library
    - DK-20789 does have DMP fusion version available
  - DK-20680A and DK-10100 streams raw sensor data only

- Tool Chains –
  - Atmel Studio - GCC compiler

Take Aways

SmartMotion : Accelerate Product deployment

- SmartMotion provides everything to evaluate and develop applications with TDK-InvenSense motion sensors
  - Simple to set up, easy to use
  - Software toolchains are free
  - No external debugger required – saves $$$
- Affordable : $99 ASP
  - Widely available at TDK Distributors (DigiKey, Mouser, CDI, Avnet) at $99
- MotionLink enables easy evaluation of the sensor hardware
- eMD includes sensor fusion and motion algorithms

TDK-InvenSense SmartMotion Support
